Axelent
Product Information

X-Guard® Cutting Package

Despite Axelent's huge range, in some environments you may need to cut the panels to exact dimensions. Then you use of something called a cutting package. Cutting Packages are available in both vertical and horizontal versions. The vertical is available in four heights of 750, 1300, 1900 and 2200 mm. The horizontal is available in 1500 mm, which is compatible with all panel widths, with or without fittings for free placement.

The standard colour is RAL 9011 but the packages can also be tailored to specific customer requirements.

Cutting Package

- Vertical and horizontal
- RAL 9011
